TERMS AND CONDITIONS: 12 MONTH EXTENDED WARRANTY ON HOT WATER SYSTEMS

Enviromate Plumbing and Roofing offer a free 12 month extended warranty on selected electric storage, gas storage, continuous flow and solar hot water systems (see reverse for included models). The extended warranty does not apply to heat pumps.

For electric storage, gas storage and continuous flow, the warranty will extend each part of the manufacturer's warranty by 12 months, e.g. parts, labour, cylinder or heat exchanger. For solar hot water, the warranty will be extended on the cylinder only. Warranty starts from date of installation.

Invoice for installation must be fully paid before warranty claims are attended.

All warranty claims must be emailed to info@enviromateplumbing.com.au and accompanied by proof of purchase.

The hot water system must be serviced as per manufacturers recommendation. Proof of this service must be presented with the extended warranty claim.

Extended warranty claims will only be attended to in standard business hours, excluding weekends and public holidays.

The extended warranty is not transferrable.

Warranty will be void if heater has been relocated or there is visible external damage.

This warranty is given in addition to consumer guarantees under the Australian Consumer Law and does not exclude them.

If you have any questions, please do not hesitate to contact us.
